COVID-19 Vaccine Phase 1 Update

Currently Authorized COVID-19 Vaccines

- 2 doses (21d)
- Efficacy: 95%
- EUA issued December 11
- Started arriving December 14

- 2 doses (28d)
- Efficacy: 94.5%
- EUA issued December 18
- Started arriving December 21

These vaccines are more effective than the flu vaccine and comparable to the efficacy rate of the measles component of the MMR vaccine.

COVID Vaccination Data

Colorado COVID-19 Vaccination Data

Data as of: 11:59:59 PM 1/17/2021

Data is updated daily by about 4 p.m. and includes data reported through the previous day. All data, for days past and present, is recalculated daily from the Colorado Immunization Information System. Vaccine administration data often has a reporting lag, and counts may not reflect all doses administered on a given day.

Prioritization Philosophy

Our focus in determining vaccine prioritization has been based on:

- 1 How we can save the most lives.
- 2 Ending the crisis that has been brought on by the pandemic as quickly as possible.

COVID-19 VACCINE DISTRIBUTION

PHASE 1

Winter

1A

Highest-risk health care workers and individuals:

- People who have direct contact with COVID-19 patients for 15 minutes or more over a 24-hour period.
- Long-term care facility staff and residents.

1B

Coloradans age 70+, moderate-risk health care workers, first responders, frontline essential workers, and continuity of state government:

- Health care workers with less direct contact with COVID-19 patients (e.g. home health, hospice, pharmacy, dental, etc.) and EMS.
 - Firefighters, police, COVID-19 response personnel, correctional workers, and funeral services.
 - People age 70 and older.
-
- Frontline essential workers in education, food and agriculture, manufacturing, U.S. postal service, public transit and specialized transportation staff, grocery, public health, frontline essential human service workers, and direct care providers for Coloradans experiencing homelessness.
 - Essential officials from executive, legislative and judicial branches of state government.
 - Essential frontline journalists.

PHASE 2

Spring

2

Higher-risk individuals and other essential workers:

- People age 60-69.
- People age 16-59 with obesity, diabetes, chronic lung disease, significant heart disease, chronic kidney disease, cancer, or are immunocompromised.
- Other essential workers and continuity of local government.
- Adults who received a placebo during a COVID-19 vaccine clinical trial.

PHASE 3

Summer

3

The general public:

- Anyone age 16-59.

Revised date: 12/30/2020

*Timeline subject to change based on supply chain. Prioritization subject to change based on data, science, availability.

Phase 1A: Estimated # of Coloradans

ESTIMATES	High Risk Health Care Workers 76,000	Long-term care residents and staff 121,000	Total 187,000
------------------	---	---	--------------------------------

Phase 1B: Estimated # of Coloradans

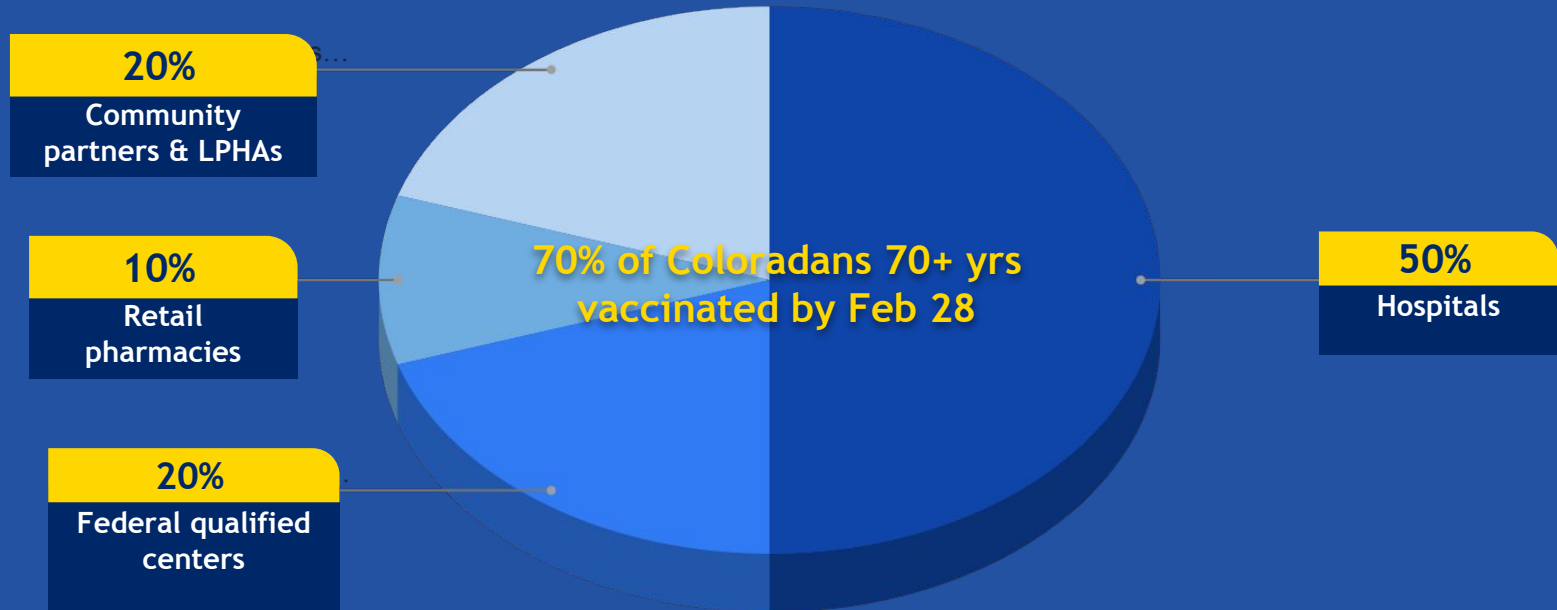

ESTIMATES	Moderate Risk Health Care Workers & EMS Responders 125,000	All people 70+ (not including 14,000 in skilled nursing centers) 562,000	Frontline essential workers 628,000	Total 1,315,000
------------------	--	--	---	---------------------------

More Changes to Phase 1 Likely

NOTE: Colorado will not be making any changes to our vaccine program until we can get concrete details on supply quantities, timelines for receiving that supply and engaging our partners who are on the ground administering vaccine.

GOAL: 70% of Coloradans 70+ vaccinated by Feb 28

These allocation percentages are estimates and the numbers are subject to change based on vaccine availability, local planning and demand from the previous week.

Early Lessons Learned

- Change is constant.
- Side effects can be more pronounced after the second dose.
- Reaching unaffiliated healthcare workers has been challenging.
- Some extra doses available in both the Pfizer and Moderna multidose vials.
- Greater vaccine hesitancy observed among LTC staff.
- Time per client can vary from 10 to 30 minutes, not including post-vaccination observation period

Future Plans

- Updates to vaccine prioritization phases
- Standard vaccine allocation framework based on county population estimates, occupation estimates and first dose completion rates
- Activation of federal retail pharmacy partnership program
- Statewide COVID vaccine media and outreach campaign
- Community-based clinics with a focus on health equity
- Expansion of enrolled provider network
